[From the Maryland Farmer.] This month is the commencement of hard labor on the farm. It is usually propitous, and we trust will be so this year.

OATS.—If you have not finished seeding your oats and clover seed, and spreading your plaster, let each and all be done with the shortest possible delay.

CORN. - Plant this important crop as soon as you have prepared thoroughly, the ground for its reception, and not only brought it into fine tilth by cultivation, but heavily fertilized the land with some one or more of the reliable super-phosphatic manures now in the market. See that what you get contains a large quantity of pure bone, sulphuric acid and potash, these three ingredients entering largely into the consistency of King Corn. Plant no sort but what is thought to be the best of its kind.

POTATOES. - Potatoes should now be planted, to come in as an early fall crop. Select good seed; Early Rose first, White Peach Blow second, pure Maine Carters third, (though often are superior to Peach Blows.) are our se lections for home use. For market, we would advise our friends to try some of the newer sorts, such as the "Peeriess."

It has been tried by several large growers of potatoes, and once by ourselves, with eminent success, the pinching off or cutting off an inch of the tops and side branches, as soon as the plants are six inches high, and again in three or four weeks after. The labor and time is small -children can perform it. By this method, it is claimed that this check to the development of the stem and branches is a stimulous to the nutriment matters in the plant, in the direction of both the roots and the multiplication of the brane es above the ground, which not only favors the power of the root, but also strengthis leroots and stalks to such a degree that

ti atters prepared by the action of these par, are increased, and applied to the formation of tubers, while at the same time the direct action of the sun's rays on the son is prevented by the thick foliage, and thus the drying up of the soil, and the injurious consequences are avoided. This theory, sustained by experiments, was reported several years ago by Dr. Klotzsck to the Government of Prussia. It was generally tried by the farmers and gardners of Prussia, and found to be of such beneficial use that we believe it has been continued to this day. Let our potato-growers try a few alternate rows,

and report at "digging time" results.
SUGAR BEETS AND MANGOLDS. - Such root crops as sugar beet, mangold wurtzel, carrot and parship, may now be advantageously sown, although some insist that for the two former, the better plan is to transplant from beds. In either case, the crop will be unsatisfactory and usprofitable, unless the land had, been deeply plowed and subsciled, heavily manured, and then highly fertilized, while the land was being worked into tip-top condition, before the seed is sown or the plants set out. The carrot is a very valuable root for general use on the farm. It is so fine an alterative during the winter and spring for horses. The beets are great provicatives to a large flow of milk, and of a richer character than that produced from turnips, on account of the greater amount of sugary properties. Parsuips are considered, by some dairymen, as very valuable food for cows, and in many places parsnip or carrot and cabbage arefed either to, e her of alternately. Our own experience is that cabbage is a great milk producer, but we verily believe a cow would not increase her weight by actual gain of a pound of meat after she had consumed her own weight in cabbage. Every horseman shoud have at hast a half acre of carrots under culture, for his horses the coming winter, especially for his favorite colts, or old brood mares; both classes are apt to become "hide-bound," unless their digestive organs are kept right.

A CHARACTER.—Old Judge W. of —, in the Old Dominion, is a character. He was a lawyer, legislator, Judge and leading politician among the old time Whigs of blessed memory; but, alas! like them, his glory departed, and, like many others of his confreres, has gone "where the woodbine twineth." Notwithstanding the loss of property and the too free use of applejack, he maintained the dignity of ex-Judge, dressed neatly, carried a gold-headed cane, and when he had taken more than his usual allowance of the favorite beverage, he was very pions at such times, always attending church, and sitting near the stand as erectly as circumstances would admit, and responding fervently. On one occasion a Baptist brother was holding forth with energy and unction on the evil of the times, and in one of his flights he exclaimed, "Show me a drunkard!" The Judge rose to his feet, and, unsteadily balancing himself on his cane, said solemnly, "Here I am, sir; here I am." The elder, though a good deal non-plussed by the unexpected response, managed to go on with his discourse, and soon warming up to his work, again called out. 'Show use a hypocrite! Show me a hypocrite! Show me a hypocrite!" Judge W. again rose, and reaching forward across a seat that intervened, touched Deacon D. on the shoulder with his cane, and said, "Deacon D., why don't you respond, sir? Why don't you respond? I did when they called on me."

DR. JOHNSTON. Member of the Royal Colloge of Surgery of London, Graduate of one of the most eminent Colleges in the United States, and the greater part of whose life has been spent in the hospitals of London, Paris, Philadelphia and elsewhere, has effected some of the most astonishing cures that were ever known; many troubled with ringing in the head and ears when asleep, great nervousness, being alarmed at sudden sounds, bashfulness, with frequent blushing, attended

sometimes with derangement of mind, were

cured immediately. TAKE PARTICULAR NOTICE. Dr. J. addresses all those who have injured themselves by improper indulgence and solitary habits, which ruin both body and mind; unfitting

them for either business, study, society or mar-These are some of the sad and melancholy effects produced by the early habits of youth, viz: Weakness of the Back and Limbs, Pains in the Head, Dimness of Sight, Loss of muscular Pow-er, Palpitation of the Heart, Dyspepsia, Nervous Irritability, Derangement of the Digestive Func-

tions, General Debility, Symtoms of Consump-

produced.

Thousands of persons of all ages can now judge what is the cause of their declining health, losing their vigor, becoming weak, pale, nervous and emaciated, having a singular appearance about the eyes, cough and symptoms of Consumptio. YOUNG MEN

Who have injured themselves by a certain practice, already described, a habit frequently learned from evil companions or at school, the effects of which are nightly felt, even when asleep, and if not cured, renders marriage impossible, and destroys both mind and body, should apply immediately.

What a pity that a young man, the hope of his country, the pride of his parents, should be snatched from all prospects and enjoyment of life by the consequence of deviating from the path of nature, and indulging in pernicious habits. Such persons must, before comtemplating

ing. MARRIAGE Reflect that a sound mind and body are the most necessary requisites to promote connubial happiness. Indeed, without these the journey through life becomes a weary pilgrimage, the prospect hourly darkens to the view, the mind becomes shadowed with despair, and filled with

the melancholy reflection that the happiness of

another is blighted with our own. DISEASES OF IMPRUDENCE. When the misguided and imprudent votary of pleasure finds that he has imbibed the seeds of this painful disease, it too often happens that an ill-timed sense of shame or dread of discovery de-ters him from applying to those who, from edu-cation and respectability, can alone befriend him, delaying till the constitutional symptoms of the horrid disease makes their appearance, such as ulcerated sore throat, diseased nose, nocturnal pains in the head and limbs, dimness of sight, deafness, nodes on the shin bones and arms, blotches on the head, face and extremities, progressing with frightful rapidity, till at last the palate of the mouth or the bones of the nose fall in, and the victim of this awful disease becomes a horrid object of commisseration till death puts a period to his dreadful suffering, by

death puts a period to his dreadful sulfering, by sending him to that undiscovered country "from whence no traveller returns."

It is a melancholy fact that thousands DIR victims to this terrible disease, through falling into the hands of ignorant or unskilful PRE-TENDERS, who, by the use of that deadly Poison, Mercury, &c., destroy the constitution, and incapable of curing, keep the unhappy sufferer month after month taking their notions or ferer month after month taking their noxious or injurious compounds, and instead of being re stored to a renewal of Life, Vigor and Happiness in despair leaves him with ruined Health to sigh over his galling disappointment.
